

Permission	Description	Atlas user	Cohort Creator	Cohort reader	Concept set creator	Moderator	public	admin
:cohortresults:breakdown:get	Get breakdown with counts about people in cohort	X		X				
:person:get:dates	View calendar dates on person profiles	X						X
*:vocabularylookup:identifiers:post	Perform a lookup of an array of concept identifiers returning the matching concept	X		X				
cache:clear:get	Clear middle-tier caches							X
cdmresults*:get	View CDM results	X						
cohort-characterization*:delete	Delete any Cohort Characterization					X		X
cohort-characterization*:exists:get	Check name uniqueness of cohort characterization					X		
cohort-characterization*:protectedtag*:delete	Unassign tag from cohort definition							X
cohort-characterization*:protectedtag*:post	Assign tag to cohort definition							X
cohort-characterization*:put	Edit any Cohort Characterization					X		
cohort-characterization:generation*:result	Get cohort characterization generation results - 2.7.x compatible					X		
cohort-characterization:get	Get cohort characterizations list	X						
cohort-characterization:import:post	Import cohort characterization	X						
cohort-characterization:post	Create cohort characterization	X						
cohortanalysis*:get	Get Cohort analyses summary or preview	X						
cohortanalysis:get	Get Cohort analyses	X						
cohortanalysis:post	Create Cohort analyses	X	X					X
cohortdefinition*:copy:get	Copy the specified cohort definition	X	X					
cohortdefinition*:delete	Delete Cohort Definition		X			X		X
cohortdefinition*:exists:get	Check name uniqueness of cohort definition		X			X		
cohortdefinition*:get	Get Cohort Definition by ID	X	X	X		X		
cohortdefinition*:info:get		X		X				
cohortdefinition*:protectedtag*:delete	Unassign tag from cohort definition							X
cohortdefinition*:protectedtag*:post	Assign tag to cohort definition							X
cohortdefinition*:put	Update cohort definition		X			X		
cohortdefinition:get	Get list of Cohort Definitions	X		X				
cohortdefinition:post	Save new Cohort Definition	X	X					
cohortdefinition:sql:post	Generate SQL from Cohort expression	X		X				
cohortresults*:get	Get Cohort reports	X						
comparativecohortanalysis*:copy:get	Copy estimations	X						X
comparativecohortanalysis*:delete	Delete estimation	X						X
comparativecohortanalysis*:get	Get estimation	X						X
comparativecohortanalysis*:put	Update estimation	X						X
comparativecohortanalysis:get	List estimations	X						
comparativecohortanalysis:post	Create new estimation	X						
conceptset*:copy-name:get	Get name for copying concept set				X	X		
conceptset*:delete	Delete Concept Set				X	X		X
conceptset*:exists:get	Check name uniqueness of concept set				X	X		
conceptset*:get	Get conceptset expression	X			X	X		
conceptset*:items:put	Update Items of Concept Set				X	X		
conceptset*:protectedtag*:delete	Unassign tag from cohort definition							X
conceptset*:protectedtag*:post	Assign tag to cohort definition							X
conceptset*:put	Update Concept Set				X	X		
conceptset:get	List of Concept Sets	X			X			
conceptset:post	Create Concept Set	X			X			
configuration:edit:ui	Access to 'Configuration' page	X						X
estimation*:delete	Delete any Estimation analysis					X		
estimation*:exists:get	Check name uniqueness of estimation					X		
estimation*:put	Edit any Estimation analysis					X		
evidence*:get	Get evidence	X						
evidence*:negativecontrols:post	Execute evidence job	X						
executionservice*:get	Get Execution Service Job status	X						
executionservice:execution:run:post	Start Execution Service Job	X						
feasibility*:delete	Delete Feasibility	X						
feasibility*:get	View Feasibility	X						
feasibility*:put	Edit Feasibility	X						
feasibility:get	List of Feasibilities	X						
feature-analysis*:exists:get	Check name uniqueness of feature analysis					X		
featureextraction*:get	Access to Feature Extraction	X						
ir*:copy:get	Copy incidence rate	X						
ir*:delete	Delete incidence rate					X		X
ir*:exists:get	Check name uniqueness of incidence rate					X		
ir*:get	Get incidence rate	X				X		
ir*:info*:delete	Delete any IR analysis					X		
ir*:protectedtag*:delete	Unassign tag from cohort definition							X
ir*:protectedtag*:post	Assign tag to cohort definition							X
ir*:put	Edit any IR analysis					X		
ir:get	List of incidence rates	X						
ir:post	Create new incidence rate	X						
job:execution:get	Get list of jobs	X	X					
job:get	Find Job names	X						
pathway-analysis*:delete	Delete any Pathways analysis					X		X
pathway-analysis*:exists:get	Check name uniqueness of pathway analysis					X		
pathway-analysis*:protectedtag*:delete	Unassign tag from cohort definition							X
pathway-analysis*:protectedtag*:post	Assign tag to cohort definition							X
pathway-analysis*:put	Edit any Pathways analysis					X		
permission:get	Get list of permissions							X
plp*:copy:get	Copy Patient Level Prediction	X						
plp*:delete	Delete Patient Level Prediction	X						
plp*:get	Get population level prediction	X						
plp*:put	Update Patient Level Prediction	X						
plp:get	List of population level predictions	X						
plp:post	Create new plp	X						
prediction*:delete	Delete any Prediction analysis					X		
prediction*:exists:get	Check name uniqueness of prediction					X		
prediction*:put	Edit any Prediction analysis					X		
reusable*:delete	Delete reusable					X		
reusable*:put	Update reusable					X		
role*:get	Get role by ID							X
role*:permissions:get	Get list of role's permissions							X
role*:users*:delete	Remove users from role							X
role*:users*:put	Add users to role							X
role*:users:get	Get list of role's users							X
role:1:permissions*:delete	Remove permissions from public role							X
role:1:permissions*:put	Add permissions to public role							X
role:get	Get list of roles							X
role:post	Create role							X
source*:daimons*:set-priority:post	Set priority daimons							X
source*:delete	Delete source							X
source*:get	Read configuration	X				X	X	X
source*:put	Edit source							X
source:connection*:get	Check source connection							X

Permission	Description	Atlas user	Cohort Creator	Cohort reader	Concept set creator	Moderator	public	admin
source:daimon:priority.get	Get priority of Source Daimons						X	
source:details:*get	Read source details							X
source:post	Create source							X
source:priorityVocabulary.get	Get source with highest priority vocabulary daimon					X		
tag:management	Permission to manage tags							X
user.get	Get list of users							X
user:import:*groups.get	Search groups in AD/LDAP							X
user:import:*mapping.get	Read Atlas roles mappings to LDAP groups							X
user:import:*mapping.post	Save Atlas roles mappings to LDAP groups							X
user:import:*post	Search users in AD/LDAP							X
user:import:*test.get	Check LDAP/AD connection							X
user:import:job:*delete	Delete user import job							X
user:import:job:*get	Get user import job							X
user:import:job:*history.get	Get user import history							X
user:import:job:*put	Update user import job							X
user:import:job.get	List user import jobs							X
user:import:job.post	Create new user import job							X
user:import.post	Import users from AD/LDAP							X
user:me.get	Get info about current user (myself)						X	
user:providers.get	Get list of authentication providers AD/LDAP							X
user:runas.post	Sign in as another user							X
vocabulary:*post	Vocabulary services	X
